

## Front Panel Decoration Size Chart

### HEADWEAR & ACCESSORY STYLES

Approximate maximum imprint areas for embroidery and heat transfer on the front panel. Designs should be centered on the front panel. Final size can vary with cap profile, structure, and artwork shape.

Front view — decoration is centered on the front panel(s). **W** = width, **H** = height (see chart below).

### FRONT PANEL AREA BY STYLE

| STYLE                         | APPROX. FRONT PANEL EMBROIDERY & HEAT TRANSFER AREA                    |
|-------------------------------|------------------------------------------------------------------------|
| 5 Panel Foam Front High Crown | <b>Embroidery — not recommended</b><br>Heat Transfer — 4.5" W × 2.5" H |
| 5 Panel Low Profile           | 5" W × 2.25" H                                                         |
| 5 Panel Mid Profile           | 5" W × 2.5" H                                                          |
| 6 Panel Low Profile           | 5" W × 2.25" H                                                         |
| 6 Panel Mid Profile           | 5" W × 2.5" H                                                          |
| 7 Panel Mid Profile           | 5" W × 2.25" H                                                         |

### NOTES

- Dimensions are approximate maximums; keep artwork slightly inside the area for clean edges.
- Center the design on the front panel. On 6-panel caps, allow for the center seam.
- Foam-front high-crown caps don't hold embroidery well — use heat transfer (4.5" × 2.5" max).
- Lower-profile crowns have less vertical room, so height maxes out around 2.25".
