## SLEEVE DECORATION DIMENSIONS

<b>FSL</b>	Full Sleeve Left	4"H x 14"W	
<b>FSR</b>	Full Sleeve Right	4"H x 14"W	
<b>LS</b>	Left Shoulder	4"H x 4"W	
<b>LW</b>	Left Wrist	4"H x 4"W	
<b>RS</b>	Right Shoulder	4"H x 4"W	
<b>RW</b>	Right Wrist	4"H x 4"W	

Decoration area is dependent on garment size, decoration method and the equipment being used. Please consult your decorator or supplier.

## DECORATION TECHNIQUES [Click the icon for details](#)

---

**EMBROIDERY**

**SCREEN PRINTING**

**HEAT TRANSFERS**

## ESSENTIAL PRODUCT INFORMATION

---

Due to the nature of 100% polyester fabrics, special care must be taken throughout the decoration process when heat is applied for curing. Please consult with your decorator or material supplier.

Due to the nature of water resistant coatings, special care must be taken throughout the decoration process. An ink catalyst additive or special adhesive heat transfer is required. Please consult with your decorator or material supplier.

## TIPS FROM OUR EXPERTS BY DECORATION TECHNIQUE

---

### **EMBROIDERY**

Embroidery is the art of embellishing a piece of apparel with a needle and thread or yarn creating stunning visual representations of various types of art. This is achieved by converting logos in a digitizing software and using various stitch patterns, angles, density and stitch types to create depth, movement and detail. Thread can be made from many materials. The most commonly used threads are polyester and rayon. There are also options such as metallic, cotton, nylon, silk and even Nomex thread for fire resistance. Embroidery has a very high-perceived value and is popular for use on most apparel, bags, hats, luggage, blankets and more!

**Follow your standard equipment and consumables guidelines for this product and fabric.**

**Resealing the back of embroidery on this product to retain waterproof and water-resistant properties is recommended.**

### **SCREEN PRINTING**

An imprinting method in which the image is transferred to the fabric. Ink is squeegeed through a stenciled screen stretched over a frame and then cured in a dryer.

**Bonding catalysts may be required for stain release, water resistant/waterproof coated and nylon fabrics.**

**For best results with non-bonded linings, specialty clamps may be required.**

**Test your application process for success prior to all production runs. Ultra-low cure transfers may be required.**

### **HEAT TRANSFERS**

A graphic, name and or number applied to a textile with a heat press. Great for quantities of any size, sports name and numbering, fashion, performance wear, print on demand programs and on-site decorating events.

**Heat transfers with an aggressive adhesive are required for stain release, water resistant/waterproof coated and nylon fabrics. Consult with your transfer supplier for recommendations.**

**Test your application process for success prior to all production runs. Ultra-low cure transfers may be required.**

**It is a best practice to consult with your decorator or consumable supplier(s) for accessories, specialty frames and applications that are specific to a shop's setup and equipment.**
